

PROTECT 2017

International Exhibition & Conference on Security & Safety

WHEN: 29-30 MARCH 2017

WHERE: SMX Convention Center, Metro Manila, Philippines

PROTECT is an annual international exhibition and conference on Security and Safety organized by Leverage International (Consultants) Inc. in cooperation with the Anti-Terrorism Council.

Launched in 2005, the PROTECT series is the only government-private sector partnership in the Philippines devoted to security and safety. It consists of a high level conference and an international exhibition.

The PROTECT exhibition is a showcase of the latest technologies, solutions and services to meet security challenges.

The PROTECT conference series on **“Doing Business Amidst New Threats”** is a serious forum for communicating areas of concern on security matters. It provides the setting for dialogue and network thinking among concerned government agencies, managers of critical infrastructures and those responsible for security and safety of business, the community and our people.

A networking cocktail on the first evening brings together government security officials, businessmen and security practitioners in a social business-like setting.

PROTECT brings to realization that all threats to security must be a commonly - shared responsibility between the government and the private sector.
