Opening Ceremonies

##### Session 1: The Evolving Security Landscape

Rising political, economic, social disturbances and disruptive shifts in technology are creating risks and instabilities which have direct impact on businesses around the world. This session will examine the evolving macro-level risk landscape and highlight the systemic threats that may disrupt businesses. These cover the following categories: a) Economic b) Environmental c) Technological d) Societal e) Geopolitical

##### Session 2: Three Most Recent and Present Security Threats to Business: State of National Security

- Extreme weather conditions
- Information/data security/disinformation
- Terrorism/extremism

##### Session 3: Future Instability Challenges

- Critical infrastructure attack
- Cyber attacks
- Governance challenges
- Pandemics
- Natural/man-made disasters

##### Session 4: Meeting the Security Authorities

This is a **Speed Meet up Session** where each delegate gets to meet a representative from each of the government agencies concerned with security and safety. To follow this session is a Social Networking Cocktail with senior government officials and diplomats as special guests.

## **DAY TWO**

### **Session 5: Sectoral Break-out Sessions**

There is a compelling need for organizations to strengthen their resilience against shocks and surprises that challenge their operations. This will be an opportunity to analyze each sector's vulnerability, address the challenges and threats they face and apply ingenuity to drive management innovations for a more resilient organization noting that Innovations both in responses and collaboration platforms have become most important tools for business to survive.

### **Session 6: Plenary session: Summary Presentations by Session 5 Panel Session Facilitators**

### **Session 7: Future Business Opportunities**

Today's business environment is characterized by rapid unpredictable changes. While some of these changes pose challenges and even threats to business, there are also business opportunities offered by some of them.

### **Session 8: Technology Presentations**

This will be brief presentations of some of the latest technological innovations affecting security. Demonstrations by exhibitors may be conducted after the session.
