

TENTATIVE AGENDA OUTLINE
PROTECT 2018

Science and Technology: The Key to a More Secure and Safe Tomorrow

Session 1 – The Age of Resilience for Managing Disasters: High Priority Sectors
Panel Discussion

Fast-paced developments in technology have the potential to help the world manage the impact of natural and man-made disasters. This session will discuss how advancing technologies and tools for disaster risk reduction can be harnessed to ensure a safer future. The most recent technologies, tools and innovations will be presented during the session.

The panel discussion starts with a scientific presentation on weather, global warming, climate change and their impact on security and safety. This will include presentations of technologies, tools and solutions to address the needs.

Session 2 – Managing Cybersecurity During This Age of Disruption:
Panel Discussion

One of the most problematic elements of cybersecurity is the quickly and constantly evolving nature of security risk. This session will discuss the most significant security trends in the next years.

Session 3 – What Every Businessman Should Know:
Global Upheavals That Will Affect Your Business

Political, social, technological upheavals happening not only in our country but around the world have, unknowingly perhaps to many, have direct impact not only on national security but on each individual business.

Session 4 – Government's Response to Security and Safety Threats:
Presentations By Lead Agencies
